This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software, software documentation, data (as defined in the Federal Acquisition Regulation), or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs) and Oracle computer documentation or other Oracle data delivered to or accessed by U.S. Government end users are "commercial computer software," "commercial computer software documentation," or "limited rights data" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, the use, reproduction, duplication, release, display, disclosure, modification, preparation of derivative works, and/or adaptation of i) Oracle programs (including any operating system, integrated software, any programs embedded, installed, or activated on delivered hardware, and modifications of such programs), ii) Oracle computer documentation and/or iii) other Oracle data, is subject to the rights and limitations specified in the license contained in the applicable contract. The terms governing the U.S. Government's use of Oracle cloud services are defined by the applicable contract for such services. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

MFT File Transfer to OL9 SFTP Remote Fails	1
--	---

Preface

Release Notes for Oracle Managed File Transfer describes new features for Release 14c (14.1.2.0.0) of Oracle Managed File Transfer, and also includes information about known issues and workarounds.

For release notes for earlier releases not covered here, refer to the Oracle Fusion Middleware library on the Oracle Help Center for the release you need.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customers that have purchased support have access to electronic support through My Oracle Support. For information, visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs> if you are hearing impaired.

Related Documents

Refer to the [Oracle Fusion Middleware library on the Oracle Help Center](#) for additional information.

- For Oracle Managed File Transfer information, see Oracle Managed File Transfer.
- For Oracle SOA Suite information, see Oracle SOA Suite.
- For versions of platforms and related software for which Oracle Managed File Transfer is certified and supported, review the [Certification Matrix on OTN](#).

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

1

New Features

Here are the new features in the Release 14c (14.1.2.0.0) of Oracle Managed File Transfer:

- In 14c (14.1.2.0.0), you can add a distinct passphrase for each PGP key and configure it to override the PGP keystore's passphrase for that particular artifact (source or target). See *Configuring the PGP Keystore* in *Using Oracle Managed File Transfer*.
- You can now configure multi-level authentication for sFTP remote source and target type while transferring files from an sFTP server outside of Oracle Managed File Transfer. See *sFTP Remote Source Type* and *sFTP Remote Target Type* in *Using Oracle Managed File Transfer*. When you select **Multi Level** as the authentication type, an additional field named **Multi Level Authentication Order** appears. The field allows you to specify the order of execution of authentication for multilevel authentication type. This property defines whether password or public key authentication is validated first.

2

Known Issues and Workarounds

Here are the known issues and workarounds for Release 14c (14.1.2.0.0) of Oracle Managed File Transfer:

MFT File Transfer to OL9 SFTP Remote Fails

Issue

Bug Number: 36708477

Impacted Releases: 14.1.2.0.0

Impacted Platforms: All

In OEL9 hosts, when you design a MFT sFTP server source or target for transfer, the default settings of **Cipher Suite** and **PKI algorithm** fields lead to failure of file transfer.

Workaround

In Advanced Properties section, under the Security tab, update **Cipher Suite** field to aes256-ctr and **PKI algorithm** field to ecdsa-sha2-nistp256.
